

EYE GLASSES CARE, TIPS, AND TRICKS

Here are some steps you can take to ensure your glasses stay in 'PEAK' condition

☐	Use your Peak Eyecare diluted alcohol spray cleaner for spot free lenses. We offer free refills if you run out!
☐	Avoid leaving your glasses in high heat areas, like your car
☐	Give your glasses, both the frame* and lenses, a wash in lukewarm water with gentle soap (like Dawn dish soap), especially the nose pads. Use only your hands, no scrubbers, sponges, or brushes. Dry thoroughly with lens cloth. *wood frames and wood siding on frames should <u>not</u> be run under water
☐	Use only lens cleaning cloths to wipe lenses. Avoid using your shirt, paper towels, Kleenex, etc.
☐	If dust is on your lenses, rinse them with water before wiping with cleaning cloth
☐	Wash cleaning cloths from time to time! No fabric softener and hang to dry
☐	Practice pulling frames straight off your face to avoid breaking the frame or stretching it out of alignment
☐	Come into the office for regular frame adjustments
☐	If your glasses are not on your face, they should be in the case
☐	Be aware of your available scratch warranties
